

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-4. (canceled).

Claim 5. (currently amended): A method for outputting help information on a mobile radio device, comprising:

generating a help signal during a partial execution of a mobile radio device function;
processing the help signal in response to a request for help in relation to the partially

executed function;

generating help information in response to the processing, wherein the help information comprises acoustic information and one or more signals that effect a visual change on at least one of a plurality of buttons of the mobile radio device.

Claim 6. (previously presented): The method according to claim 5, wherein the visual change is the illumination of the at least one button at a level that is different from the plurality of buttons.

Claim 7. (previously presented): The method according to claim 5, wherein the visual change is a repeated illumination of the at least one button.

Claim 8. (previously presented): The method according to claim 5, wherein the visual change is a turning off the illumination of the at least one button.

Claim 9. (previously presented): The method according to claim 5, wherein the acoustic information comprises voice output of a help text via a speaker in the mobile radio device.

Claim 10. (previously presented): The method according to claim 5, wherein the help information is generated in a predetermined sequence, depending on the type of device function that is being partially executed.
